Training

TRAINING: PEGA SENIOR SYSTEM ARCHITECT

This training is for Pega System Architects who want to further expand their knowledge of the Pega Platform and improve their skill to efficiently implement Pega solutions.

The training focuses on the tasks a Senior System Architect performs to develop a Pega application.

ABOUT THIS TRAINING

The Senior System Architect training is designed to help Application Developers increase their knowledge of application development on the Pega Platform.

PURPOSE OF TRAINING

This is a follow-up training to teach Pega System Architects how to efficiently build Pega solutions.

CERTIFICATION

After completing the training, you will be largely prepared for the PCSSA (Pega Certified Senior System Architect) exam of the same name, which you can schedule through Pega. Upon passing this exam, you will receive the official PCSSA certificate.

WHAT YOU WANT TO KNOW:

DURATION

4 or 7 day training consisting of classroom learning days with time in between for online self-study.

LANGUAGE

The training materials are in English. Classes can be provided in both EN and NL.

PROFILE FIT

This training is aimed at Developers and Pega System Architects.

RESULT

You have mastered the basic concepts and principles of application development in Pega and are largely prepared for the exam.

METHOD

A combination of online self-study and classroom training delivered by experienced Pega Senior System Architects.
