TRAINING: PEGA BUSINESS ARCHITECT

BROCHURE

Begin your journey as a business architect with Pega Platform™ by learning the capabilities of App Studio to develop applications on Pega Platform that advance the digital transformation of organizations. In this course, you will learn how Pega's Center-out business architecture underpins the Pega Express™ values and best practices for application development and delivery. You'll be introduced to Constellation, Pega's new UI architecture for building enterprise applications using the latest open-source technologies.

TRAINING: PEGA BUSINESS ARCHITECT

ABOUT THIS TRAINING

The training provides insight into the features of App Studio in Pega Platform™, which you can use to develop applications that advance the digital transformation of organizations. Become familiar with the Pega Express™ delivery approach and the Center-Out™ business architecture.

As a key member of the development team, the Certified Pega Business Architect collaborates with Pega Certified System Architects, participating in every aspect of the design and construction of a Pega Platform application.

PURPOSE OF TRAINING

In this training you will learn the core principles of application development in Pega's App Studio. With the aim of increasing your commitment and effectiveness as a Business Architect in a Pega development process.

CERTIFICATION

After completing the training, you will be largely prepared for the PCBA (Pega Certified Business Architect) exam, which you can schedule at Pegasystems. Upon passing this exam, you will receive the official PCBA certificate.

WHAT YOU WANT TO KNOW:

DURATION

2, 3, 4 or 4+ day training course consisting of classroom teaching days with time in between for online self-study.

LANGUAGE

The training materials are in English. Classes can be provided in both EN and NL.

PROFILE FIT

This training is aimed at Business Users and Business Analysts.

RESULT

You have mastered the basic aspects of application development in the App studio of Pega and you are largely prepared for the exam.

METHOD

A combination of online self-study and classroom training delivered by experienced Certified Pega Business Architects.

*** These costs are per participant, excluding VAT. From 6 participants or customization other prices apply.

DIFFERENCE IN DAYS:

2-DAYS TRAINING:

In preparation for each training day, the participant reads through the theoretical material online and also completes the corresponding practical exercises.

3-DAYS TRAINING:

In preparation for each training day, the participant reads through the theoretical material online.

During the training, the practical exercises are done in class.

4-DAYS TRAINING:

The 3-day training is extended to include a 4th training day where a case is discussed to reinforce the theory. The participant prepares this case at home.

4-DAYS + TRAINING:

The 4-day training case study is applied and developed not at home, but during the training to reinforce the theory.
