PEGA | Specialized Partner

Training

TRAINING
PEGA ONE DAY

Brochure

Are you, as a manager and professional, curious about what Pega can do for your organization? Many employees already work in environments where Pega is used and the stories about this innovative platform probably sound familiar to you.
But what is Pega really? How can you use it to optimize business processes and develop applications quickly?

Do you want to gain quick and practical insight into the possibilities of low-code development with Pega?

This intensive, yet accessible one day training gives you everything you need to know to understand and apply the power of Pega.

WHAT WILL YOU LEARN?

- A clear introduction to the Pega platform and the power of low-code development
- How to develop easy-to-use business applications with Pega's intuitive tools
- How to Effectively Harness the Power of Pega GenAI
- Modeling business processes in a natural way, for optimal collaboration between business and IT
- How Pega processes data from different sources and translates it into valuable reports
- How users work with Pega to create an intuitive and enjoyable user experience (UX)
- The steps within a customer journey project: from idea to a working product, fast and effective
